

A Recipe For Winter

First, gather icy spherical snowballs with cosy, comfy mittens.

Next, add a silky, smooth spider web glistening with freezing frost.

Sprinkle carefully into the pot feathers warm from a robin's fiery red breast.

Swirl in safely, frosty fabulous fog.

Season with hail stones the size of a mini mint.

Pour in delicious hot chocolate and hot, gooey marshmallows.

Then heat gently over an orangey fire.

Though deciduous trees stand cold and bare.

The evergreens stand green and leafy tall or short covered in snow.

Winter is a cold time of the year but yours will sparkle and glow with magic.
